## 10 TRAINING BENEFITS

### SUMMARY

Training can be training, good training, or excellent training. Pearson Technologies Inc. provides excellent training only.

As detailed below, excellent training results from the 10 features of the Pearson Technologies programs. These features include: focusing on the specific type and level of training you need, learning by doing, learning from a recognized expert who shares his significant experience, receiving extensive and practical knowledge, learning how to make good decisions, receiving extensive written materials for reference and future use, receiving unbiased information, and reducing your time and costs.

Excellent training results in a reduction in future costs that exceeds the cost of the training. Pearson Technologies Inc. training is an excellent investment.

### CHOOSE THE TRAINING YOU NEED

From more than 20 courses, you can learn the subjects and skills you need: cable installation and testing; connector installation and testing; splicing; system design; developing component specifications; and troubleshooting. With our 24 years in training, we can provide you with almost

## **CHOOSE THE LEVEL OF SKILL YOU WANT**

You choose from [basic, advanced, and professional levels of training](#).

## **RECEIVE THE BEST TRAINING!**

[Hands-on training](#) is the best way to be successful! You will spend most of your installation time in learning by doing. You will learn with over \$100,000 in equipment, without waiting for shared equipment.

## **RECEIVE TRAINING FROM EXPERTS IN FIBER AND IN EDUCATION**

You will learn effectively from an instructor who is [recognized as an expert](#) in his field. You will learn skills from a professional who has developed and field proven these techniques.

## **LEARN VOLUMES OF PRACTICAL INFORMATION**

We have packed our courses with the practical, subtle and useful information you need. This information comes from 29 years of doing what you will need to do: designing systems, specifying components, and installing and testing cables and connectors. This information is not available from any other source.

## **LEARN HOW TO MAKE DECISIONS**

Avoid confusion! From the information, alternatives and guidelines you will learn, you will be able to choose the solution best suited to your needs.

## **RECEIVE COMPREHENSIVE, WELL DEVELOPED NOTES**

Avoid frantic note taking. With our extensive notes, you will relax and focus on understanding and learning the materials. These comprehensive notes ([see example](#)) will become a valuable reference, which you will use long after you have finished the course.

## **RECEIVE UNBIASED INFORMATION**

Designers with knowledge of how to specify cable, connector, and splice performance create networks with increased reliability. For 18 years, Pearson Technologies design programs have provided such knowledge.

## **SAVE TIME**

You will receive a large amount of well organized, easily understandable, essential, and significant information. Because of 32 years of developing fiber optic training, Pearson Technologies is able to present fiber optic training in half required by other training programs! You save time and reduce the time and cost of personnel being out of office.

## **SAVE MONEY**

Many times your investment! Save money 3 ways: learn how to avoid mistakes, to reduce maintenance costs and to avoid overspending.
